

**PENDING CLAIMS AS AMENDED**

1. (Currently Amended). An apparatus for providing electrical coupling comprising: a motor having a hollow shaft extending there through and being rotated thereby; an electrical conductor at least partially located within said hollow shaft; and an antenna horn, connected to said electrical conductor and to said shaft, wherein said antenna horn is rotated by said shaft on a central axis of said shaft; and  
wherein the electrical conductor comprises a center conductor and an outer conductor,  
and the outer conductor is fixed to said shaft.
2. (Canceled)
3. (Canceled)
4. (Canceled)
5. (Currently Amended). The apparatus of claim [[4]] 1 further comprising a rotational coupler attached to said electrical conductor.
6. (Canceled)
7. (Canceled)
8. (Canceled)
9. (Canceled)
10. (Canceled)
11. (Currently Amended). The apparatus of claim 1 further comprising a platform connected to the shaft, ~~wherein the electrical conductor is affixed to the shaft and rotates therewith.~~

12. (Canceled)

13. (Canceled)
